Bell Copper is focused on the development to production of the La Balsa copper mine in Michoacan, Mexico & the Granduc copper mine in British Columbia, Canada while continuing exploration and development of its pipeline of copper projects in some of the world's premier copper producing regions.

SUBSCRIBE TO OUR EMAIL LIST

The Americas host some of the world's premier copper producing regions. Bell Copper has assembled an exceptional portfolio of development and exploration assets in these stable regions. The development to production of the La Balsa project in Mexico provides future funding for the development of the Granduc Mine as well as continuing exploration for large undiscovered copper deposits by one of the industry's deepest copper exploration teams.
